Section 4 - First Aid Measures

4.1 Description of first aid measures

- Inhalation** • Move victim to fresh air. Administer oxygen if breathing is difficult. Call a physician or poison control center immediately.
- Skin** • Immediately flush skin with water and vinegar for at least 20 minutes. Remove contaminated clothing. Call a physician or poison control center immediately.
- Eye** • Immediately flush with water for at least 20 minutes. If wearing contact lenses, remove first. Call a physician or poison control center immediately.
- Ingestion** • Do NOT induce vomiting. Obtain medical attention immediately. Drink a couple of glasses of water or milk. If vomiting occurs, keep airway clear.

4.2 Most important symptoms and effects, both acute and delayed

- Refer to Section 11 - Toxicological Information.

4.3 Indication of any immediate medical attention and special treatment needed

- Notes to Physician** • All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Section 5 - Firefighting Measures

5.1 Extinguishing media

- Suitable Extinguishing Media** • NFPA Class B extinguishers (Carbon Dioxide or foam).
Material is non-combustible. In case of fire use media as appropriate for surrounding fire.
- Unsuitable Extinguishing Media** • None known.

5.2 Special hazards arising from the substance or mixture

- Unusual Fire and Explosion Hazards** • Isolate from acids.
Keep container tightly closed.
Containers may rupture when heated.
Applying to hot surfaces requires special precautions.

Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive fumes.

Hazardous Combustion • None known.
Products

5.3 Advice for firefighters

- Do not enter confined fire-space without full bunker gear.
SMALL FIRES: Move containers from fire area if you can do it without risk. Structural firefighters' protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations where direct contact with the substance is possible. Water spray may be ineffective on fire but can protect fire-fighters. Use fog nozzles if water is used.
Wear positive pressure self-contained breathing apparatus (SCBA).

Section 6 - Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal Precautions • Wear appropriate protective clothing. Do not touch or walk through spilled material. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate enclosed areas.

Emergency Procedures • Stop spill at source. Dike area and contain. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Keep unauthorized personnel away.

6.2 Environmental precautions

- Prevent entry into waterways, sewers, basements or confined areas. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body.

6.3 Methods and material for containment and cleaning up

Containment/Clean-up Measures • Neutralize with weak acid & dilute with plenty of water. Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers. Flush area with large quantities of water and remove immediately.

6.4 Reference to other sections

- Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

Section 7 - Handling and Storage

7.1 Precautions for safe handling

Handling • Wear appropriate protective clothing. Avoid breathing . Use only with adequate ventilation. Avoid contact with skin, eyes, and clothing. Wash thoroughly after handling. Do not take internally. Handle and open container with care. Keep container closed when not in use. Treat empty containers as hazardous.

7.2 Conditions for safe storage, including any incompatibilities

Storage • Keep away from incompatible materials. Store locked up. Keep container/package tightly closed and stored upright in a cool, well-ventilated place. Do not store above 49 C/120 F.

7.3 Specific end use(s)

- Drain opener.

8.2 Exposure controls

Engineering

Measures/Controls

- Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Personal Protective Equipment

Respiratory

- In case of insufficient ventilation, wear suitable respiratory equipment. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.

Eye/Face

- Wear chemical splash safety goggles.

Hands

- Wear protective gloves impervious to this material.

Skin/Body

- Wear protective clothing impervious to this material.

General Industrial

Hygiene Considerations

- Provide readily accessible eye wash stations & safety showers. Handle in accordance with good industrial hygiene and safety practice. Do not get in eyes or on skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco or using the toilet. Destroy contaminated leather articles. Launder or discard contaminated clothing.

Environmental

Exposure Controls

- Follow best practice for site management and disposal of waste. Avoid release to the environment.
